DVD Flick Crack [Win/Mac]

DVD Flick is a software solution designed to help you create DVDs using the video files stored on your computer. Basically, you can add as many files as you want, of course as long as they fit on a DVD, and play them on your dedicated DVD player, media center or any other devices able to deal with such content. While the interface is pretty intuitive and easy to navigate, DVD Flick provides support for a wide array of video formats, including 3GP, AVI, FLV, MP4, MKV, MOV, OGM and WMV. Moreover, the application lets you create interactive menus to allow the viewers browse through files, with multiple, but not too many, built-in templates included in the pack. The settings menu allows you to choose the title of the project and the target size, configure the encoder and the thread count, adjust video and audio options, set up playback and customize the burning process. DVD Flick enables you to create either an ISO file that can be later burned on a disc or burn the project automatically once your work comes to an end. The program boasts an online help file that's more of a step-by-step guide especially useful to beginners who may need assistance while trying to set up a new project. Of course, the whole process takes some time, because you need to pick the files and configure the menus, but the amount of needed resources is minimal. Overall, DVD Flick is a very easy to use application that can be safely used by beginners and more experienced users at absolutely no cost. Features: • Advanced interface with a streamlined interface, easy-to-use options and a wide range of video formats supported • User-friendly option to select video, audio and subtitle tracks • Create menus with multiple, but not too many, built-in templates • H.264/MPEG-4 AVC, H.264/MPEG-4 AVC MPEG-4 Part 10, H.264/MPEG-4 AVC MPEG-4 Part 10 High Profile, H.264/MPEG-4 AVC MPEG-4 Part 14, MPEG-2, MPEG-4 Part 2, MPEG-4 Part 2 File, MOV, AVI, QuickTime/MPEG-4 AVC, QuickTime/MPEG-4 AVC MPEG-4 Part 14, QuickTime/MPEG-4 AVC MPEG-4 Part 14 High Profile, QuickTime/MPEG

What's New In DVD Flick?

Welcome to a revolution! DVD Flick is the only DVD maker that gives you the power to convert your video files into DVD discs and enables you to play them in your DVD player. It is the only DVD burner that allows you to add as many files as you want, from any folder, and instantly convert them to DVD discs. Create DVD menu and disc in minutes using our easy-to-use interface. DVD Flick is the only DVD maker that supports any multimedia files you have, no matter what type of video files they are. It is the only DVD burner that allows you to add your own content to the disc by burning any type of files to the disc. Never worry about the constraints that hamper other similar products: • Supports your videos even if the original format is not Windows Media or Quick Time. • Supports any type of video formats, from AVI, FLV, MP4, MKV, MOV, OGM and WMV. • Built-in templates allow you to create your DVD in an easy way and create several DVDs at once without the need of using extra software. • Allows you to create an ISO file that can be later burned to a DVD. • Supports all the new and advanced features you may need for creating DVD menu and disc. • Supports both standalone players and your DVD player. • Supports multiple project templates. • Allows you to merge several projects into one DVD. • Allows you to customize DVD menu. • Supports ISO burning. • Allows you to burn the project automatically. • Allows you to automatically burn DVD to disc. • Works with Windows 2000 and Windows XP. • No registration or software activation is required. • Avoids DVD codecs, drm, and copy-protection. • User-friendly interface. Re: DVD Flick - The first Multimedia Burner - BETA 11 Posted 05 September 2011 - 05:22 AM Hey, just wanted to share a little about this DVD Flick. The first thing that i've noticed is that this is a BETA version and that DVD Flick is on the 2.9.3.0 version of Nero AIM. Re: DVD Flick - The first Multimedia Burner - BETA 11 Posted 05 September 2011 - 06:42 AM @Joaquin When we are talking about Blu-ray, we are talking about the discs coming from companies like Sony, Paramount, Warner and other majors. They are all encoding everything as-is and with copy protection mechanisms built-in so that people do not have the chance to rip it and use it at home. Re: DVD Flick - The first Multimedia Burner - BETA 11 Posted 07 September 2011 - 02:20 AM @Joaquin When we are talking about Blu-
